

East Side Interceptor Lining Project

Conveyance System Improvements in Renton

Eastside Interceptor Project - update for the week of Nov. 7 – 13

The [Eastside Interceptor \(ESI\)](#) is one of the main sewer lines that brings wastewater from eastside homes and business to the South Treatment Plant in Renton. This project is repairing about 3,700 feet of the line, which is corroded and nearing the end of its service life (see [map](#) below).

For Nov. 7 through Nov. 13:

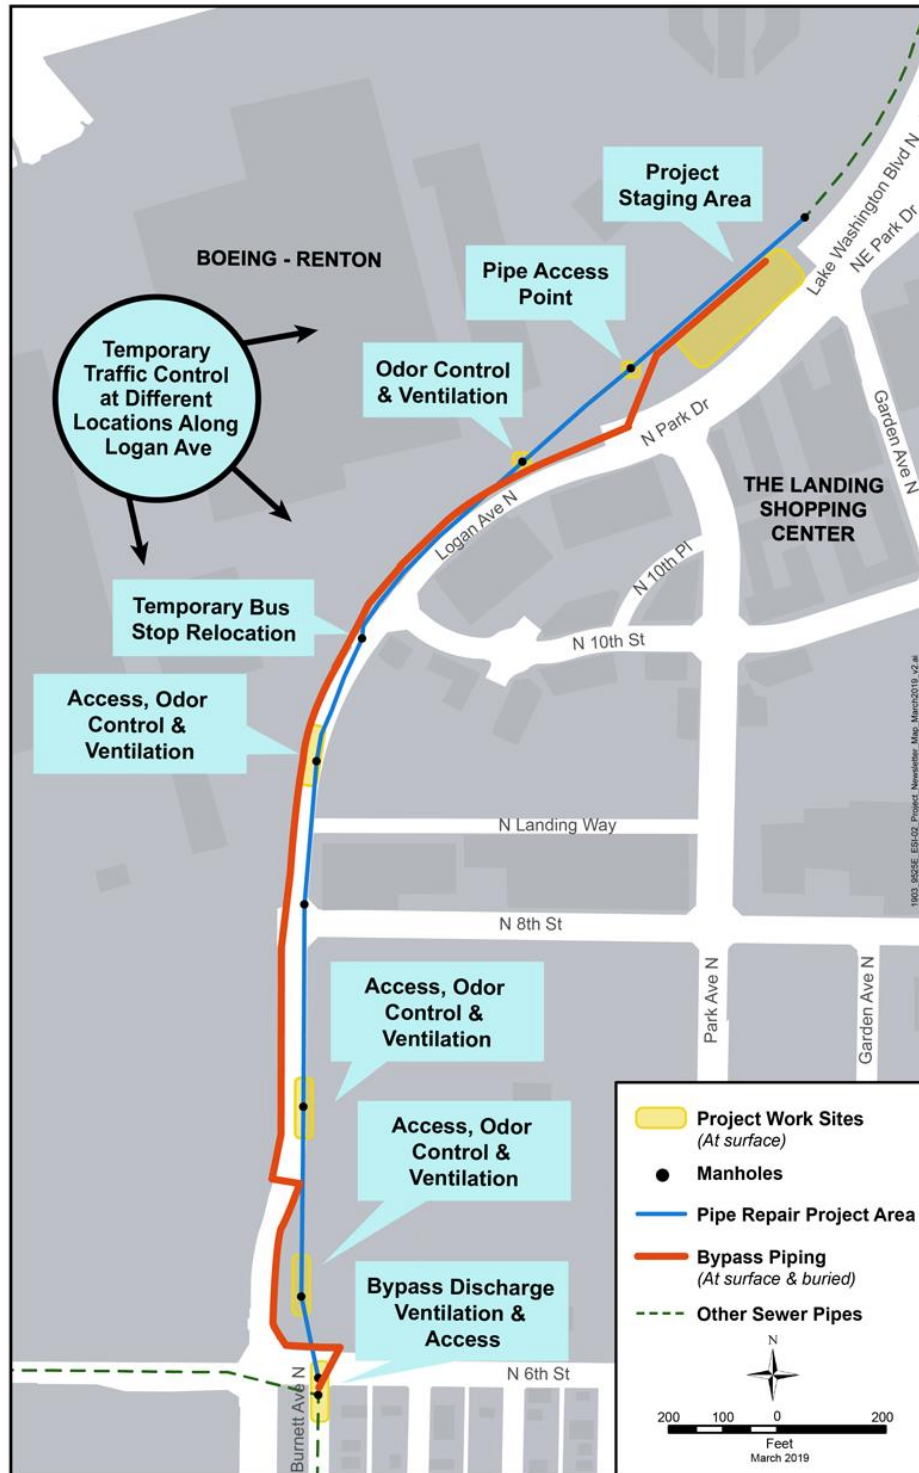

- **Current and upcoming work:** Lining work is now finished and the bypass sewage flows have been returned to the Eastside Interceptor pipe. Ongoing work for this project includes:
 - Taking apart and removing the bypass pipe, including under roadway crossings.
 - Removing the temporary work areas, including at Burnett Avenue North & North 6th Street.
 - Restoration, sidewalk and street repair.
- **Temporary lane closures and traffic control along Logan Avenue continue this week, primarily at night.** This allows crews to remove the bypass pipe from underneath roadway crossings.
- **Work hours:** Most work is being done during days, Monday-Saturday. Temporary street closures are primarily occurring at night, Monday-Saturday.
- **Odor control used for the project:** There are no longer any odors associated with operation of the temporary bypass system; however there may be slight and temporary odors at the manholes, dismantling of the bypass pipe and restoring work areas back to their original condition.
- **Barriers along Logan Avenue:** This is an active construction area – do not touch or cross the barriers or walk through the work area. Please cross the street to find safe areas to walk.
- **The bike lane** along Logan Avenue between Park Avenue and North 6th Street is closed due to construction. Please cross over to the east side of Logan Avenue or take an alternate route. The bike lane is scheduled to reopen in December.
- **The work area at Burnett Avenue and North 6th Street:** Over the next few weeks expect activity here, as the work area is being dismantled and removed.
